

UNITED STATES DEPARTMENT OF AGRICULTURE
BUREAU OF AGRICULTURAL ECONOMICS
WASHINGTON, D. C.

January 12, 1950

**CERTIFIED SEED POTATO PRODUCTION IN 1949, LARGEST ON RECORD
EVEN THOUGH SMALLER ACREAGE THAN IN 1948 PASSED FINAL INSPECTION**

Certifying agencies in 31 States reported that 48,427,628 bushels of certified seed potatoes were produced in 1949. This total represents about 12 percent of the Nation's production of all potatoes and includes 51 named varieties. Although the 1949 crop of certified seed potatoes was the largest on record, it exceeded only slightly that of 1948 when 48,317,290 bushels were produced. It is, however, 84 percent larger than the 1938-47 average of 26,330,950 bushels. Of the certifying agencies in 31 States reporting to the Bureau of Agricultural Economics, those in 14 States reported more certified seed in 1949 than in 1948, 12 reported less, and 5 reported no certified seed potatoes produced in 1949. Largest increases (percentage basis) in the leading certified seed producing States were in Michigan, Wisconsin, Pennsylvania, Idaho, New York, Minnesota, and Maine. Sharply smaller crops than in 1948 were produced in South Dakota, Oregon, North Dakota, and California.

The 141,461 acres that passed final inspection in 1949 made up the smallest acreage in 6 years. This total is 12 percent smaller than in 1948, when 160,250 acres passed inspection, but it is 19 percent larger than the 10-year average of 119,069 acres. A majority of the important potato States reported declines in acreage in 1949, but those showing increases were New York, Pennsylvania, Wisconsin, Michigan, and Idaho. The season was favorable for plant and tuber growth, and yields of most varieties were exceptionally good, averaging 342 bushels per acre--highest on record. This compares with 302 bushels in 1948 and the 10-year average of 213 bushels. These yields, however, are not comparable with yields of all potatoes because the certified stock in some cases represents graded and tagged seed.

Maine's production of 23.4 million bushels represents nearly half the United States crop of certified seed. The 8 percent increase over 1948 was achieved in spite of a 12 percent reduction in acreage harvested. Production in several other important producing States is as follows: North Dakota, 5,303,000 bushels; Minnesota, 5,113,671; California, 3,137,898; Wisconsin, 1,776,900; New York, 1,750,571; Colorado, 1,746,673; Idaho, 1,610,707; and Oregon, 804,485 bushels.

The production of Katahdin, a widely adapted late variety, was reported at 15,862,075 bushels. This represents about one-third of the United States total of certified seed potatoes, and is nearly as large as the combined production of the next three leading varieties - Triumph, 5,626,477 bushels; Cobbler, 5,471,185 bushels; and Chippewa, 5,187,165 bushels. Production of other varieties in bushels is as follows: White Rose, 3,728,886; Russet Burbank, 3,300,081; Green Mountain, 2,438,785; Pontiac, 1,229,564; Dakota Chief, 1,048,099; Red McClure, 1,014,263; Sebago, 939,964; Russet Rural, 376,555; Teton, 348,785; Red Warba, 322,128; Ontario, 251,675; Sequoia, 239,839; Essex, 189,830; Mohawk, 188,151; Early Ohio, 117,040; Progress, 75,321; Red Sebago, 64,200; Houma, 61,289; Rural New Yorker, 60,429; Burbank, 37,517; Warba, 36,727; Kennebec, 25,010; Satapa, 20,016; Cayuga, 20,000; Calrose, 18,050; Waseca, 15,606; Erie, 14,230; Menominee, 9,000; Canus, 7,200; Pawnee, 6,090; Kasota, 5,825; Earliest of All, 5,000; Brown Beauty, 3,960; Early Rose, 2,407; Chenango, 2,337; British Queen, 2,200; Ashworth, 1,925; Gold Coin, 1,700; Dakota Red, 1,602; Beauty of Hebron, 1,250; White Cloud, 855; Madison, 788; Empire, 700; Yampa, 697; Marygold 562; Snowdrift, 300; Harmony Beauty, 297; White Pontiac, 40; and varieties not classified, 43,951 bushels.

CERTIFIED SEED PRODUCTION IN CANADA: The 1949 production of certified seed potatoes in the Provinces of New Brunswick, Nova Scotia, and Prince Edward Island,

reported at 17,516,193 bushels, is the largest on record. This production is 51 percent larger than that of 1948, when 11,602,076 bushels were produced, and compares with the 1938-47 average of 6,050,500 bushels. The 1949 production in bushels, by varieties, for the three Provinces, with 1948 production in parentheses, was: Katahdin, 8,329,829 (5,173,616); Green Mountain, 3,439,894 (2,267,171); Sebago, 2,656,520 (1,492,149); Cobbler, 2,419,049 (2,220,516); Triumph, 383,578 (302,051); Pontiac, 143,925 (53,650); White Rose, 44,880 (3,465); Chippewa, 44,427 (8,402); Sequoia, 23,882 (38,820); Warba, 13,410 (9,081); Russet Burbank, 7,215 (3,150); Pawnee, 1,277 (165); Early Rose, 1,054 (536); Mohawk, 933 (172); Burbank, 290 (0); and all others, 6,030 (29,132).
